[CSEN402] **Computer Organization & System Programming,** Spring 2017
Semester Project Information
(Read it carefully)

Weight	**15%** of the course

Description	- The aim of this project is to give you the opportunity to simulate the basic computer hardware architecture.
	
	- The project must be carried out on *Logisim* simulation tool:
	  http://www.cburch.com/logisim/
	
	- *Logisim* manual is available at:
	  http://www.cburch.com/logisim/docs/2.1.0/guide/index.html

Teams' Formation Criteria	- Teams across different tutorial groups are allowed. - The maximum number of members in a team is **4.** - The team *must* choose a team representative that will be responsible for all future submissions and the contact.
Milestones	- **Milestone I:** Build the Basic Computer Full Bus System - **Milestone II:** To be Announced - **Milestone III:** To Be Announced

Teams' Formation	1. Fill teams' formation form which must be submitted *once* by the team representative.
	2. You will receive a team ID through a document posted on the MET website. You will be using this ID for all your future submissions.
	3. If a student is submitted as a team member in more than one group, he/she **will not be** assigned to any of the groups and will be assigned *randomly*.
	4. If a student wants to work on the project individually, he/she has to fill the form to state that explicitly.
	5. Students who will not fill a form as a team member to any project team will be assigned *randomly* to a group.
